

Dear Parents,

Our school nurse and CNA have completed the required training and received supplies and equipment for the COVID testing program at AC Alexander. Prior to beginning testing, parents, teachers and staff are asked to register (giving consent) in advance.

Attached you will find two letters, one in English and one in Spanish. You will also find information on the incentive program.

We are sending this information to you via email. We will also include the link for the students on our school webpage. (LINK ON OUR WEBSITE IS NOT FOR STAFF). Parents can change the registration language to Spanish after clicking on the link. Letters and registration translations in Arabic and Vietnamese are forthcoming.

- Participation is strictly voluntary.
- **Only our school students** will be tested. This is NOT for siblings, parents or others in the community.
- Each person needs to be registered only one time using the link unique to our school.
- Multiple children in the same family must be registered separately. If you have more than one child in our school, each child will need their own individual registration.
- Schools may begin testing once the registration/consent has been verified by the nurse or CNA. Only when a student or staff member is registered with the Health Dept will they be able to be tested on the school site.
- Paper or verbal consents will not be accepted.
- All students may participate in the school site testing with registration in place **EXCEPT Pre-K students. They cannot participate**-they will continue off site testing as before.
